

Monday, 18 December 2017 – Issue: 10/2017

Merry Christmas!

Thank you for your patronage during 2017. Best wishes to you & your family for a very Merry Christmas & a prosperous 2018.

Make every drop count!

What is your spray pattern like?

New nozzles produce a uniform distribution when properly overlapped, creating the best chance of every droplet hitting the target.

Worn nozzles affect flow rate and droplet size, creating higher output with more spray concentrated under each tip.

Damaged nozzles have very erratic output, resulting in overlapping and under application of chemical.

Talk to your local North West Ag store today about your nozzle, filter and spray part requirements to make every drop count!

Viper - NEW Pour-On Lousicide For Sheep

Viper is Bayer's latest innovation in off-shears sheep lice control, containing thiacloprid, a highly potent neo-nicotinoid insecticide, which laboratory studies have shown is six times more potent than imidacloprid.

- Highly potent, next generation chemistry

- 100% rapid knockdown
- 4-Weeks killing power
- Lano-Lock® user friendly formulation:
 - Facilitates chemical distribution around the sheep's body
 - Rainfast
 - User friendly (low odour, quick application, easy to clean equipment).

Talk to your local North West Ag store for more information about Viper.

Polymaster's PolyPromos

The latest PolyPromos from Polymaster include Liquid Fert tanks, troughs, rainwater/pipeline tanks, diesel Ute packs and fire fighting units. Ask for your copy and talk your local North West Ag store for more details.
