Acquisition of Rural Supplies and Services Division of Harberger Farm Supplies

AgLink
WIMMERA

Helping growers make the right decisions

It is with great excitement that we can confirm that the North West Ag group have purchased the rural supplies/services and agronomy services divisions of Harberger Farm Supplies. Trading under the North West Ag ownership commenced on Monday 2 May 2016.

Harberger Farm Supplies has been part of the Wimmera region for three generations starting with Keith Harberger (Sr.), then Keith Harberger (Jr.) and grandsons Kirk and Reece Harberger. Over that time Harberger Farm Supplies became a very well respected group in the industry for excellence in rural supplies and agronomy services along with grain storage, auger, silo and seeding equipment sales and transport.

Harberger Farm Supplies have sold to North West Ag the rural supplies, agronomy services and gypsum/fertiliser spreading divisions of the business. Harberger Farm Supplies will continue to operate in the region on all other parts of their business and both companies will continue to have a close working relationship to continue to serve the local farming community.

The existing team members that service these divisions within Harberger Farm Supplies will continue and be part of the North West Ag and AGRIVision Consultants teams. The existing rural supplies sites of Harberger Farm Supplies at Donald, St Arnaud and Marnoo will become part of the North West Ag group and as such will be branded with the North West Ag logo, with Harberger Farm Supplies continuing to operate with the grain, machinery and transport divisions.

The relationship between the North West Ag group and Harberger Farm Supplies has always been strong and both organisations have worked closely together for many years. This will continue in the future.
