Cyclone 20' N-Sure Gates

Turn this:

The new Cyclone 20' N-Sure gates, with patented gusset technology, are now available from North West Ag Services.

These gates are ideal to convert any cut in the fence into a great looking, practical gate way that any machinery can pass through.

Into this:

NEW Glanvac-Eryvac Dual Vaccinator for Sheep

zoetis

SAVE TIME AND LABOUR WITH THE
GLANVAC-ERYVAC DUAL VACCINATOR

**GIVE YOUR GLANVAC AND ERYVAC
VACCINES AT THE SAME TIME**

- 1 INJECTION SITE
- PROTECTIVE NEEDLE SHROUD
- SERVICE KIT
- NEEDLE REMOVAL TOOL

NEW

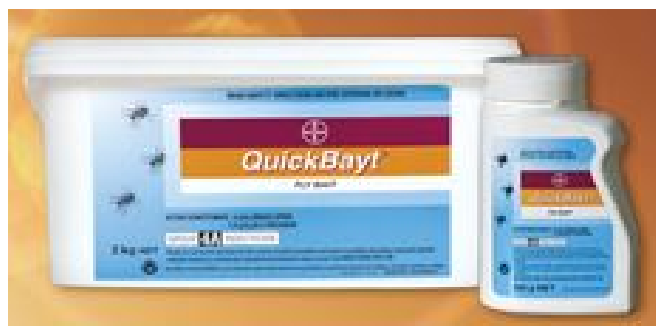

The new Glanvac-Eryvac Dual Vaccinator will be available from Zoetis the 1st January 2017, allowing producers to give their Glanvac and Eryvac vaccines in a single vaccination, saving time and labour.

The dual vaccinator features two fixed 1mL barrels with one needle or injection site and has a protective needle shroud to minimise accidental self-injections.

The fully serviceable applicator is approved by the APVMA for use with Glanvac and Eryvac only. Use of other products may result in reduced efficacy and/or safety of the product(s) used.

Fighting Flies with QuickBayt

Whether they bite, sting or annoy, flying insects can be a constant nuisance around your animals and for you as well!

Due to increased rainfall across the country we can expect a heavy fly burden this coming summer. With temperatures starting to rise we are already starting to see increased fly activity. Combat flies this season with Bayer's QuickBayt range.

What makes QuickBayt effective?

Quickbayt contains a unique attractant, the housefly sex pheromone, which lures the flies away from nuisance areas and attracts them to the bait. Quickbayt contains the powerful neonicotinoid insecticide, Imidacloprid. Imidacloprid is an insect neurotoxin that kills the adult house fly (*Musca domestica*) and the lesser housefly (*Fannia canicularis*), including organophosphate resistant strains.

Why use QuickBayt to combat flies?

- Fast knockdown - kills flies on contact within minutes, including those resistant to other chemicals.
- Save Time - Spot spray or paint, saving application time and volume usage.
- Easy to Use – simply mix with water and spray onto surfaces.
- Set and Forget - excellent residual - results visible for 4 - 6 weeks.

QuickBayt Fly Bait comes in both a 350g and 2kg pack size. Speak to your local North West Ag store for more information on this great product!
