Grain Storage Information Sessions

North West Ag Services invite you to attend an information session on grain storage.

There will be two sessions on Wednesday October 5; Donald from 10am - 12pm and Sea Lake 1:30 - 3:30pm.

Topics to be discussed include:

- Farm hygiene around storage sites
- K-Obiol
- Conserve on Farm
- Conserve Plus
- Phosphene
- Treatment of grain in Silo Bags

Guest speaker is Kerry Miles from Grain Storage Solutions. Grain Storage Solutions began fumigating and servicing the need of farmers and grain handlers in 2009, since then GSS has grown to a business that employs 4 full time staff and operates across VIC, NSW, QLD, SA & TAS.

Kerry has 16 years experience in managing and applying pest control measures to ensure grain remains insect free and fit for market requirements most of this time was spent working with a bulk handling company.

Garden Groundwork in Spring

The Experts' Choice

Like humans, your garden plants thrive on regular feeding throughout the year – happy, healthy plants are also more resistant to pests and disease.

Neutrog's year-round fertilising programs have been specifically developed by experts who rely upon optimum plant growth to earn their living. Follow their recommendations for Spring below and call into your local North West Ag store to pick up your Neutrog products.

Garden groundwork in Spring

Year round fertilising for year round health

Like humans and animals, plants require regular feeding throughout the year – at least once in each season. Happy, healthy, well nourished plants are more resistant to pests, diseases, heat stress and frost.

Vegetables & Herbs: Mix some Rocket Fuel through the soil before planting spring vegetables and herbs to help give your seedlings the best start in life. Water in well with GOGO Juice.

As your edibles such as tomatoes and capsicums begin to set flowers you can feed them with Sudden Impact for Roses, the potassium, calcium and magnesium boost will help produce large and tasty tomatoes during summer.

It's time to plant potatoes! Mix two handfuls per square metre of Seamungus through the soil before planting your seed potatoes. As you cover the emerging shoots with straw or mulch, the occasional dose of a handful of Rocket Fuel per square metre is ideal.

Flowering Plants: Sprinkle some Strike Back for Orchids over any potted colour you have or are planting out this season. You'll be rewarded with cascades of colour over spring and summer.

Feed your roses and all other flowering plants (except natives) with Sudden Impact for Roses. Water it all in with GOGO Juice to encourage a faster uptake of the nutrients by the plant.

Fruit Trees: Lightly tip prune citrus trees to encourage new growth and spread Gyganic for Fruit and Citrus around the drip zone of the plant. Repeat this application every 8 weeks until the end of February.

Natives: As natives finish flowering, prune them back by up to one third and feed with two good handfuls of Seamungus per plant.

Lawns: Spring signifies the start of new growth for lawns. Feed now with a nitrogen boosted fertiliser such as Upsurge or Sudden Impact for Lawns for lush and healthy green lawn, or the totally organic alternative is Blade Runner.

Now is a great time to fix bare patches in your lawn. Top dress the patches for repair with Seamungus Crumble and spread lawn seed over the area. Water it all in using GOGO Juice.

Planting: Use Seamungus, Rapid Raiser or Rooster Booster for all new plantings.

These three Neutrog favourites are used by Botanic Gardens around Australia. As organic, BFA registered products used by professional turf managers, gardeners and horticulturalists they are safe and easy to use on your own garden, pots and lawn in every season.
