Introducing Granulock SS from IPF

GRANULOCK^{SS}
PRECISION STARTS HERE

INTRODUCING GRANULOCK SS
PRECISION STARTS HERE

EVERY GRANULE DELIVERS MORE

12% SULPHUR

More precision: the right combination of nutrients in every granule

More sulphur: the extra S sulphur-hungry crops and pastures need, all season long

REPLENISHES DEPLETED SULPHUR AND PROMOTES:

- ✓ Strong early root growth
- ✓ Vigorous establishment
- ✓ Healthy emergence
- ✓ Even growth

incitepivotfertilisers.com.au

IPF have a new sulphur-rich addition to the Granulock® family.

With last year's heavy rainfall, soil tests conducted by Nutrient Advantage® Laboratory Services have revealed that a significant portion of Cropping and Pasture Topsoils are now deficient in Sulphur.

With the introduction of Granulock SS, you now have the benefit of two different forms of Sulphur, offering both an extra early boost, as well as sustained delivery over the growing season:

- 4% Sulphate Sulphur
Quick-acting and immediately available
- 8% Elemental Sulphur
Oxidises into Sulphate form through growing season

The introduction of Granulock SS marks an exciting time for IPF and its customers.

To find out more, speak to your local North West Ag store.

Agriculture Victoria's Livestock Electronic Identification Workshops

AGRICULTURE VICTORIA

Electronic Identification Sheep & Goats

Investing now,
protecting tomorrow

Agriculture Victoria is conducting workshops in north-west Victoria during February to assist sheep and goat producers with the adoption of electronic identification.

All sheep and most breeds of goats born in Victoria from 1 January 2017 require an electronic NLIS (Sheep) tag before they leave their property of birth.

Workshops will run for approximately 2 hours and registrations are required.

See the following table for the list of workshop dates and locations and to register call 136 186 or visit the following website:

<https://www.eventbrite.com.au/e/workshops-to-help-producers-with-electronic-id-tickets-30508418501>
