Maximising Canola Yield Potential Following A Wet Year

From time to time it is useful to get back to basics to check you are doing all you can to maximise yield. Don't forget why we are growing canola in 2017 when the world is well supplied with wheat; we grow canola to make money and naturally, to supply a well sought-after commodity.

Get your order in now for Ahrens Field Bins & Silos

Gravity & PTO Auger Grain & Fertiliser Field Bins 30 tonne to 38 tonne capacity

Standard features include:

- Fully welded 32° to 35° base cone angle
- Zincalume steel roof and tank construction on grain bins
- Easy lift hitch and spring assisted wheels for effortless lowering and raising of the bin
- Wide side doors on the roof for easy filling
- Fill at eave height
- Sherwell section ring beam (eliminating grain traps)
- Easily accessible cone base manhole
- PTO Auger models have built-in 22' (SAVIC) or 24'11" (NSW/QLD) auger for quick unloading

Also available:

- Fertiliser field bins with Colour Coat wall sheets and a full internal 2-pac base epoxy treatment for corrosion resistance

Don't get caught out like many did last year!

See your local North West Ag store to place your orders now for field bins from Ahrens to ensure delivery prior to harvest.

Following last year's huge harvest, Ahrens are inundated with silo orders. Time is running out fast to place your order to ensure new silos can be delivered before the end of the financial year. See in store for the complete Ahrens range of sealed silos from 55 to 126 tonne.

For more information speak to your local North West Ag store.

Fit out your Seeder

North West Ag can supply the complete Agmaster, Maxi Point and Great Western Tillage range of knife points, sowing boots, press wheels and coulters to fit out your seeder for cropping this year.

Call in today to your nearest branch to discuss.

Sheep Yards

Are your old sheep yards up to it? Do they need extending or a few damaged panels replaced? North West Ag can supply a complete new set of yards or simply choose the panels that you might need for an upgrade.

Ask your local North West Ag store for details of single panels available through Cyclone or to view Cyclone's Sheep Yards brochure.

Pre-lambing Ewe Health

Pre-lambing is a critical time point in the annual calendar of a sheep operation. It is important that you implement a comprehensive pre-lambing ewe animal health program, in order to protect ewes, as well as their lambs, and help get more lambs through to marking.

Ewe vaccination pre-lambing is really important in order to ensure ewes have maximum immune protection at the point of lambing, but also to ensure that lambs are given the best kick-start in life, with strong colostral antibody protection passed from ewe to lamb in the first milk (colostrum).

Minimising parasite load in ewes pre-lambing is also critical to ensure optimal performance from both ewes and lambs.

For more information on Zoetis's pre-lamb program speak to your local North West Ag store.

Lamb Concentrate Pellets

Concentrate Pellets

A protein, mineral and vitamin concentrate that will balance cereal grain based rations for lamb, beef and dairy animals. An ideal way to deliver rumen buffers and essential vitamins and minerals that grain based diets lack.

- High Protein levels
- High nutritional value
- Ideal combination with grain
- Conveniently mixed with grain
- Increased yields over grain based rations

www.coprice.com.au

With lambs now going into containment facilities and onto a grain based diet, we need to consider adding rumen buffers with vitamin and mineral additives.

CopRice Lamb Concentrate pellets are protein, mineral and vitamin concentrate that will balance cereal grain based rations for lambs. An ideal way to deliver rumen buffers and essential vitamins and minerals that grain based diets lack. Learn more about them by speaking to your local North West Ag branch.
