Master weeds with weedmaster ARGO

Master weeds this season with Nufarm's high performance weedmaster® ARGO®.

weedmaster ARGO is a 540g/L Dual Salt Technology® glyphosate that delivers powerful, broad spectrum weed control.

Unlike other glyphosate formulations, weedmaster ARGO and the weedmaster range is formulated with Dual Salt Technology, which combines two bases to form an advanced glyphosate formulation.

Combined with a tailored surfactant package, Dual Salt Technology allows for a higher active loading and accelerates plant uptake as the glyphosate passes through the cuticle into the plant sap transport more quickly.

weedmaster ARGO also has improved compatibility over single salt glyphosates and

is the ideal partner with a wide range of complimentary Nufarm products to deliver broad spectrum weed control on both grass and broadleaf weeds at knockdown.

With excellent viscosity and low foaming, weedmaster ARGO is easy to handle and has been extensively tested to ensure the product flows easily under cold conditions and faster pumping into the tank compared to other glyphosate formulations.

Made locally in Australia at Nufarm's manufacturing sites at Laverton and Kwinana and backed by Nufarm's No Worries Warranty, weedmaster ARGO delivers hassle free, powerful weed control.

For more information on weedmaster ARGO, contact your local North West Ag store.

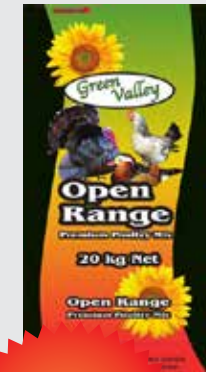

TROUGH BLOX 20 x 220g

Trough Blocks have algaecide which controls algae and slime in stock troughs. One block treats 7000 litres of water with block lasting 2-4 weeks and should be replaced when slime starts to return.
