NORTH WEST AG SERVICES **EOFY SAVINGS**

All Clear® DS

**USE THE PREMIUM SPRAY
AND TANK CLEANER THAT
DOES IT ALL!**

Most of today's herbicides leave residues in tanks, hoses, filters and nozzles. Even small amounts of these residues can damage crops. With the high cost of seed, labour and diesel, why risk the health of your crop? And not only can the residues harm crops, but they can also breach MRLs, cause equipment erosion and block filters. Farmers should take a little more care rinsing products out, and use the right product to do it can save you big dollars.

All Clear DS is actually tested on all the products we say that it will remove from spraying equipment. And this season, we are adding 8 new products to the list of residues that can be easily removed by this multipurpose spray and tank cleaner.

Using products like OMO, chlorine or ammonia just don't compare: each of these cleaners may remove 1 or 2 products, but only All Clear DS has got you covered for a large range of actives and formulations. Even very sticky products like carfentrazone and flumioxzin are removed from tanks, with recent tests showing that 98.89% of flumioxzin residues are removed with All Clear DS compared to only 65.65% by ammonia. Can you afford to take that risk?

Removes damaging residues
from your boom sprayer

Suction filter.
Left side washed
with water. Right side
cleaned with
All Clear DS®.

All Clear DS works in three ways for a complete clean. It has:

- surfactants to physically remove residues and stop re-sticking;
- sequestrants to lock up molecules and improve rinse out; and
- detergents to solubilise and break down residues.

**And whereas ammonia and chlorine are
Dangerous Goods and Class 8 corrosive,
All Clear DS has a long list of advantages
for you:**

- All Clear DS is a non Dangerous Good so it is easy to store, handle and mix;
- All Clear DS will not corrode equipment and has low foaming;
- All Clear DS has a long shelf life.

NEW CHEMISTRY, NEW THINKING, NEW PARADIGM.

WITH THE FLEXIBILITY THAT YOU HAVE ALWAYS WANTED.

Paradigm™
HERBICIDE
ARYLEX™ ACTIVE

Dow AgroSciences

Paradigm™ Arylex™ Active Herbicide delivers a low dose, wide spectrum solution for the control of broadleaf weeds.

Widely compatible with the ability to safely go across wheat, barley, oats and triticale, Paradigm fits easily into your spray programme. Increase your productivity with less downtime due to tank clean out, changing the spray mix or worrying about compatibilities. Get some precious time back and make life easier.

Shift to the new Paradigm Arylex Active.
